of the former? He had asked Mr. Stayner, the one who is behind the bill. If the root could be produced with profit. He showed from analysis that a ton of canagre has in it more tannic acid than three tons of bark. Three tons can be raised to an acre. The worth of a ton of bark in Sait Lake is \$30. Then an acre would produce \$2.0 worth of this root. There is no other crop in Utah that will do that well. In the face of the fact that the appropriation bill contains only small amounts for the public institutions and it is contemplated to go further in debt, here comes a proposition to give \$19,000 to an industry that does not need help. There is no politics in this, and no H. B. 14% an act in relation to the be-fouling of streams, was then consid-ered. It was passed by a vote of 8 to 4 C. B. There is no politics in this and no sense either. It does not reflect credit on the Republican side that such a bill is introduced. They will have hard work to convince the neople of the northern and central parts of the territory that the proposition is all right. I expect the vote will stand as usual 7 to 5, but there is dianger in such measures as these. If we open the door to silk and beets and canaigre where will we stop. He was then called down, his time having expired. As no Republican seemed prepared to answer the hard facts put forward, the roll was called, and all the Kepublicans voted "aye," and all the Democrats but Hart, who was absent, "No."
